Compression Sealants

Teflon Joint Sealant

Uni Seal is a joint sealant manufactured from 100% expanded PTFE and combined with a self-adhesive strip for easy installation. Thanks to its unique properties, it can be compressed into a thin wide ribbon which conforms to all surface irregularities; leaving a strong, inert, tough and universal sealant which resists high temperatures, pressures and corrosive environments

Teflon Joint Sealant String

PTFE valve stem packing is a self forming packing material. It forms to all surface irregularities such as scratches and pits. It is made from 100% virgin PTFE and has a high tensile strength. It is self lubricating and eliminates valve stem wear. It contains no contaminants and is unaffected by most common chemicals. The temperature range is -450F to +550F.

Compression Seal tape

Blue Monster Compression Seal Tape contains no adhesive. This tape seals by compression, so pulling the tape as tight as possible forms a chemical reaction that fuses the layers of tape into a mass of silicone. Once fused, the silicone mass forms a HD bond on the leak or connection that serves as an emergency or long-term repair.
